EUROPEAN MINERALS YEARBOOK

Welcome to the first edition of the new 'European Minerals Yearbook'!

This Yearbook contains data for primary minerals production, trade, resources and reserves; and for secondary materials it contains data for mineral-based waste generation, treatment and trade. It also contains case studies relating to the recovery of 10 commodities from key waste streams.

Please select the data you wish to view from one the following 4 options (primary minerals by country or by commodity; or secondary materials by category or case study).

We would be pleased to receive any comments you may have relating to this Yearbook, please send them to ... << contact e-mail to be inserted here >>
